

Strategies for Addition

Standard Algorithm

$$116 + 19 = n$$

Step 1: Line up the digits by place value

Step 2: Begin adding the digits in the ones place and
move to the left.

Don't forget to
line up your
digits vertically
by place value.

$$\begin{array}{r} +1 \\ 116 \\ + 19 \\ \hline 135 \end{array}$$

If your sum is
greater than 9,
you have to
regroup or
carry.

$$n = 135$$
