

Strategies for Subtraction

Finding the difference between two numbers
using a number line

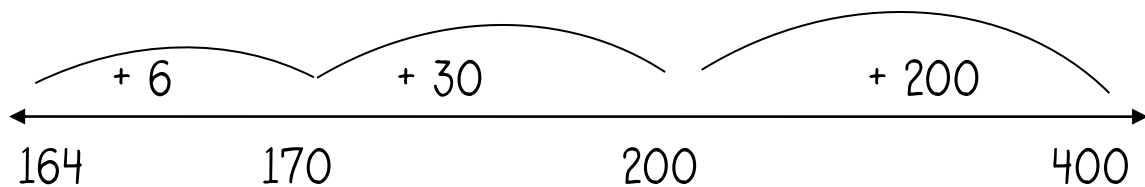

$$400 - 164 = n$$

Switch your equation to addition:

$$164 + n = 400$$

Start with 164 and end with 400 on your number line

Use landmark numbers to make "jumps"

Last step: add your jumps $200 + 30 + 6 = 236$

$$n = 236$$
