

Board of Education

Board of Education

- The Board's powers and duties derive from the State Constitution, the laws of New York State, and the rulings of the State Commissioner of Education. Its four main responsibilities are:
 - Establish all school district policies;
 - Develop an annual budget for public approval;
 - Approve or disapprove the Superintendent's recommendations regarding personnel matters and the many contracts the District must enter into; and
 - Act as a two-way communications link between residents and the District.
- The Board receives many reports concerning the operation of the District, the condition of properties, the financial position of the District, and the performance of students, teachers and other staff.
- It decides what actions will be taken in legal matters and determines staff and students' disciplinary cases as legally required. It provides for purchases and building improvements and approves necessary financial arrangements.
